Gene,

Thank you for putting so much thought into this! I appreciate getting it now too so there will be time to review it and put it together with other comments prior to another group discussion on all of this.

Tomorrow we will focus on the population part of the gpcd issue and hopefully get some good input from TWDB and the state demographer. We will need another meeting separately to go over the categories again.

With the tight timeframe we have, hopefully we can get something scheduled in the next two weeks.

I will make sure we copy you on potential times and dates as we very much need you as part of the discussion.

Karen
